

ENERGY

WE WORK HERE.

Energy is something we all need. Without it, we'd be cold and cranky. We'd be in the dark, not texting on our cell phones. Fortunately, the energy industry has Clifford-Jacobs Forging, the chosen provider of reliable custom forgings. The kind that get the job done, day after day, regardless of the application. Whether miles out to sea on an oil platform, in a remote field of wind turbines, or in reservoirs of natural gas, our experience in and knowledge of the energy industry are the most

powerful tools in your toolbox. We know what works best and where, and we know what doesn't. And then there's the peace of mind that comes from knowing you're depending on Clifford-Jacobs forged parts. There is absolutely nothing easy about harnessing energy, except your choice of Clifford-Jacobs Forging when you need a custom or standard component. The more you work with us, the more you'll see how important that becomes.

Call us today at 217.352.5172 for your next custom forging order.

STAINLESS STEEL

304, 304L, 316, 316L, 405, 410, 17-4PH, 15-5PH

CUSTOM GRADES

Caterpillar, General Electric, Westinghouse, Boeing Aerospace

■ The above grades can be ordered to meet acceptable AMS, ASTM, or military specifications as needed. Clifford-Jacobs forges most commercially available variations of these grades.

Clifford-Jacobs takes pride in the speed and accuracy with which we reply to requests for quotes. In addition, we offer short to medium runs, from 25 to 15,000 pieces annually, and we have a seasoned, expert staff with a CNC-equipped die shop on-site. To expedite answers to your questions, please have the following information at hand:

- Material grade
- EAU and delivery quantity
- Date requested
- A good-quality, fully dimensional print

If required, please include any specifications you may have for machining, heat treating, and testing.

Clifford-Jacobs can produce custom or standard forgings within the following parameters:

- From 3 pounds to 800 pounds
- Up to 30 inches in diameter
- Up to 50 inches in length
- Up to 18 inches in spindle height
- Annual quantity of 25 to 15,000 pieces
